

# New Product

## JISLON® Urban Bollard DK-10

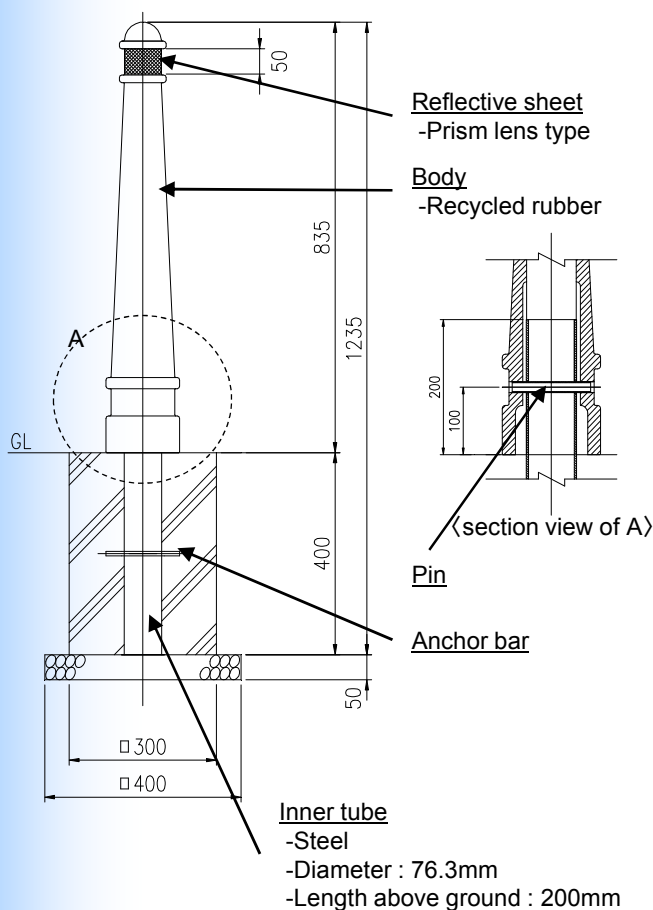

### Characteristic

- The **DK-10** has been developed as a new type of the DK-9 with **tapered shape** (diameter from 65mm to 150mm) .
- The DK-10 **looks like a traditional cast-iron or steel bollard** and fits into urban locations.
- Thanks to special mixed rubber chips, the impact on drivers and pedestrians, who hit accidentally, is very limited.
- The DK-10 absorbs its' temperature, people friendly products.
- The reflective sheet gives drivers attention at night.
